# Cyclojet

Carrier's CYCLOJET is India's first outdoor AC unit that has unique cylindrical design.

This innovative design solution enhances performance and efficiency while easily fitting into any corner of your home.

360° Air Flow

10% More Efficient

Top Air Discharge

40% Space Saving

33% Bigger Condenser

## Cyclojet Advantage

### Innovative Design

CYCLOJET's unique cylindrical design is an 'Industry first' in home air conditioning solutions. The 360 degree flow of air gives the best in-class performance and helps cool indoor temperatures faster.

### Slick • State-of-the-art • Silent

CYCLOJET dissipates hot air vertically - it doesn't feel hot even if you're standing next to it. Strategically placed rubber grommets and extra thick insulation also ensure reduced vibrations and noise.

### Compact

CYCLOJET takes up to 40% lesser space, making it easier to install, maintain and maneuver. Designed specifically for India, it's great for houses that have a space constraint.

### Better Condenser

A bigger\* and better quality condenser and a 360 air suction ensures that every Carrier AC that comes fitted with a CYCLOJET outdoor unit is 10% more efficient than conventional outdoor units.

\* 33% larger condenser area - based on internal test against standard Carrier 12K, 3 star machines.

### Efficiency in All Weather

The machine comes equipped with a F-class\* and IP-44 waterproof motor. Hence, it is more reliable and dependable under even the most extreme weather conditions.

### Available in Star Rating

\* Not applicable for 22K 5 star
